Chicago, IL 60657

To whom it may concern,

I'm writing this letter to bring to your attention the power problems I'm facing in 4529 N. Greenview Ave. #2W. I contacted Marco, the maintenance man about the issue and he stated that he would have to contact you before he could do any repairs. I waited five days without a response, and then called and left a message.

I'm measuring voltage from my wall at 94 volts. This is well outside the range of acceptable power, which should be no less than 110 volts. It has caused damage to my computer equipment and lost work productivity. The net result is that the apartment is unlivable in it's current form.

I can see only 2 possible remedies to the situation, either repairs must be made to the unit, or I can move to another unit in the building that has usable power.

Please contact me as soon as possible so we may discuss solutions to our problem. I can be reached at (773) 410-1619.

With regards

Mike Doty
